Welcome to the 7th Workshop on Lung Health

Dear Colleagues & Friends,

After six successful editions, we proudly announce the *7th International Workshop on Lung Health*, which will be hosted in the marvelous city of Prague from January 16th to January 18th, 2020.

Once again we invite you to take part to the Workshop, to **realize a successful meeting, where – as per our tradition – interaction with World Experts, small group learnings and new approaches to the hot topics of the respiratory medicine**, will be the milestones.

Daring wisely has been one of the values of this dynamic forum and to continue this tradition and following the suggestions received from last edition attendees, we elected as silver thread of the Workshop **“Rethinking Lung Diseases: towards tailored management”**.

Acquire new knowledge, learn new approaches and discover new insights to be applied immediately in the daily clinical practice as soon as back at work, will be the most important aims of the 3 working days in Prague.

Beside the traditional and always main themes of our field, we retain that emerging and extremely important topics such as **NTM, Biologicals, Bronchiectasis, Digital Medicine and CF in Adults** need to have an important role in the 2020 scientific program. For this reason you will find sessions and lectures dedicated to debates, insights and updates on the mentioned arguments, where interaction and discussion with the audience will be the key challenging moment. Thanks to the success of this format during the 6th Edition, we will give large space and time to **Pros and Cons, Yearly Reviews** on specific topics and **cases analysis** as the “Clinical and Imaging Ground Round”, where participants will be challenged on solving controversial or complex real life situations.

The **young generation initiatives** will see the reconfirmation of the Rising Stars and Poster Awards, while the Future Leaders Tutoring programme will be furtherly developed giving to younger doctors the opportunity to interact, share and compare their own practice and experiences.

We would therefore be grateful if you may consider to attend and even more important, contribute with your personal input to the success of this our traditional researchers and educational yearly appointment.

We look forward to welcome you in the amazing winter atmosphere of Prague!

Yours Sincerely,

F. Blasi

G.W. Canonica

S. Centanni
