

	Allergy	Immunology	Pulmology I	Nursing
Thursday, December 10th				
9-10:30	Allergy diagnostics (Korošec, Košnik) Edward Knol: Clinical implementation of Basophils Activation Testing in allergy diagnostics Bernadette Eberlein: Diagnostics of alpha-gal syndrome			
11:00 -12:30		Immune deficiencies (Avčin, Ihan) Anna Sediva: Lungs in Primary Immunodeficiencies Natasa Toplak: Recent advances on management of autoinflammatory diseases Maruša Debeljak: Genetics of inborn errors of immunity Brigita Koren: Selective IgA deficiency – our experience Gašper Markej: PID and COVID-19	Interventional pneumology: EBUS (Rozman)	
13:00-14:30	Drug allergy / anaphylaxis (Kopač) Lenka Sedlackova: Radiocontrast media hypersensitivity Grzegorz Porebski: MRGPRX2 in immediate drug hypersensitivity reactions - tips or tricks Tina Vesel Tajnšek: Myths and truths in drug allergy in children Peter Kopač: Perioperative anaphylaxis		Pleural diseases: Infections (Marc)	
15:00-16:30	Immunotherapy (Zidarn) Mirjana Turkalj: Immunotherapy of food allergy: does it work? Radek Gawlik: Schedules of subcutaneous tree and/or grass pollen immunotherapy of allergic rhinitis patients		Rehabilitation (Šarc) Gabor Kovac	
17:00-18:30			Imaging (Požek) Aleksander Marin: TBA Ante Marušič: TBA	
19:00-20:30	Urticaria/angioedem / AD (Bizjak) Frank Siebenhaar: Why omalizumab (usually) works in CU? Edward Knol: Implementing biomarkers in immunophenotyping and severity scoring of atopic dermatitis Matija Rijavec: Predictive factors of response to omalizumab treatment in chronic spontaneous urticaria Slađana Andrejević: Hereditary angioedema and systemic autoimmune diseases		Rare pulmonary diseases (Terčelj, Osolnik) Marco Confalonieri: pulmonary fibrosis Nadja Koren: PET-CT pri sarkoidozi	
Friday, December 11th				
9-10:30		Innate immunity (Jerala) Nick Gay: TBA Iva Hafner Bratkovič: TBA Mateja Manček Keber: TBA	Lung cancer (Čufer, Mohorčič) Maximilian Hochmair: Novel drugs for lung cancer and how to optimize access to them Bojan Zarič: TBA Jelena Spasić: TBA	Zdravstvena nega 1 (Kadivec)
11:00 -12:30		Cancer immunotherapy (Čemažar) Gregor Serša: Interleukin-12 gene therapy for treatment of cutaneous tumors Urška Kamenšek: Gene electrotransfer for cancer immunotherapy Martina Reberšek: Retrospective analysis of treatment-naive Slovenian patients with metastatic melanoma treated with pembrolizumab – real-world experience. Damijan Valentinuzzi: Radiomic analysis of lung cancer immunotherapy Marija Ivanović: Immunotherapy of lung cancer immunotherapy: real world experience Marina Mencinger: Outcomes and safety in patients with metastatic urothelial cancer receiving atezolizumab at the Institute of Oncology Ljubljana	Intensive medicine (Gorjup) Giacomo Bellani: Spontaneous breathing in critically ill patients: opportunities and challenges Dušana Obradović: Recognizing a critically ill patients-do we need scoring systems? Jovan Matijašević: Direktna kateterske intervencije u akutnoj PTE Rihard Knafelj: Use of volatile sedation in ICU patients. Alenka Golcnik: Ventilation monitoring in intubated patients - basic principles	Zdravstvena nega 2 (Kadivec)

13:00-14:30		Autoimmunity I (Tomšič/Čučnik) Katja Perdan Pirkmajer: Systemic sclerosis – where do we stand? Katja Lakota: Integrative approaches in systemic sclerosis Blaž Burja: A role of dimethyl- α -ketoglutarate in TGF β -driven profibrotic responses of dermal fibroblasts Tina Kamhi Trop. Rok Orel: Autoimmunity and Coeliac disease Blaž Krhin: Autoimmune thyroiditis Manca Ogrič: Detection of anti-drug antibodies improves therapeutic drug monitoring in patients treated with TNF- α inhibitors	Thoracic surgery (Marko Bitenc)	Zdravstvena nega 3 (Kadivec)
15:00-16:30		Autoimmunity II (Božič/Čučnik) Yehuda Shoenfeld: Hyper stimulation of the immune system as a major role in Autoimmunity ; CPI and Silicone breast implants as proofs of concepts. Polona Žigon: Extracellular vesicles in antiphospholipid syndrome Alojzija Hočevar: Can we predict gastrointestinal and/or renal complication in IgA vasculitis? Tadeja Kuret: Insight into cell and molecular profiles in adult IgA vasculitis	Palliative care (Lunder)	Zdravstvena nega 4 (Kadivec)
17:00-18:30		Genetics in pulmonology (Rijavec) Anastasios E. Germenis: "Rare Diseases: From Therapeutic Orphans to Pioneers of Precision Medicine"	Diseases of pulmonary circulation (Salobir) Nika Skoro-Sajer: TBA Arsen Ristić: TBA	Zdravstvena nega 5 (Kadivec)
19:00-20:30		Transition between pediatric and adult pneumology (Berce) Vojko Berce: Ultrasound in diagnostics and etiologic definition od pneumonias in children	Sleep disordered breathing (Ziherl) Stefan Mihaicuta: OSAS phenotypes might tailor different treatment strategies Kristina Ziherl: OSAS and women – different clinical presentation and different consequences Jasmina Gabrijelčič: Noncardiovascular complications of untreated OSAS Irena Šarc: CPAP or NIV in treatment of OHS	Zdravstvena nega 6 (Kadivec)
Saturday, December 12th				
9-10:30		Transfusion (Čurin)	Lung infection / Tuberculosis (Svetina)	
11:00 -12:30		Transplantation (Jerar)	Lung function tests (Fležar)	
13:00-14:30			Obstructive lung diseases (Škrbat) Ratko Đukanović: Transcriptomics Ratko Đukanović: Sharp Project	
15:00-16:30		COVID	COVID
