

Virtual school on lung transplantation

Basic and advanced level

Providing state-of-the-art knowledge on a wide array of issues relating to lung transplantation

The courses will consist of online lectures, case discussions and interactive workshops covering the following topics:

BASIC COURSE (3 June, 2021)

- Lung transplantation referral guidelines
- Candidate selection in CF, ILD, COPD and PH
- Pre-implantation genetic diagnosis, physiopathology and prevention
- Acute cellular rejection
- Humoral rejection

ADVANCED COURSE (17 June, 2021)

- Chronic lung allograft dysfunction (CLAD) definition
- CLAD phenotypes, definition and pathogenesis
- Lung transplantation in post-ARDS
- Lymphoproliferative disease and other malignancies
- Non-heart-beating donors
- Ex-vivo donor lung perfusion

The courses are €30 for ERS members and €40 for non-members.
