

EU-RESPOND

Survey on Thoracic Ultrasound Education in Europe

Identifying common strengths, barriers, and priorities for future training

8–10 MINUTES

Voluntary and anonymous

EUROPE-WIDE SURVEY

Respiratory specialist (in training)

TRAINING & EDUCATION

Current state and future needs

WHAT IS EU-RESPOND?

EU-RESPOND is a European collaborative survey exploring how thoracic ultrasound is taught, supervised and used in respiratory medicine across Europe. By comparing current practice between countries and clinical settings, we aim to identify common strengths, gaps and priorities for future training.

THIS SURVEY EXPLORES

- Ultrasound equipment and image archiving
- How thoracic ultrasound training is organised and supervised
- Clinical exposure, experience and confidence
- Perceived importance of key thoracic ultrasound skills
- Barriers and facilitators to effective training
- Priorities and needs for future education across Europe

WHY YOUR RESPONSE MATTERS

Broad participation will help ensure that differences between countries and training settings are visible in the European results and can inform future educational initiatives.

HOW WILL RESULTS BE USED?

- To map current training practices across Europe
- To identify educational needs and barriers
- To inform future educational initiatives

WHO CAN PARTICIPATE?

- Respiratory trainees
- Respiratory specialists
- Supervisors / trainers
- Allied health professionals involved in respiratory care
